UK CONSTRUCTION DESIGN AND MANAGEMENT (CDM) REGULATIONS AND COMPLIANCE

Fully Accredited By:

Chartered Institute of Professional Certifications

CPD Certification Service

PROGRAM OVERVIEW

The UK Construction (Design and Management) Regulations 2015 (CDM 2015) establish the definitive legal framework for managing health, safety and risk across every stage of a construction project. With **expectations rising sharply under the Building Safety Act 2022**, organizations must now demonstrate effective governance, competent duty holders and robust compliance systems—or face intensifying regulatory scrutiny.

This certified program will equip you to convert CDM 2015 requirements into practical, defensible controls across the entire construction project lifecycle. You will learn to interpret statutory duty holder responsibilities with authority, coordinate clients, designers and contractors seamlessly, and neutralize foreseeable risks before they escalate into compliance failures. Through the **General Principles of Prevention, pre-construction planning and design risk management**, you will sharpen accountability and embed health and safety into every critical project decision. You will also build hands-on expertise in **Pre-Construction Information (PCI), Construction Phase Plans (CPP) and Health and Safety Files**, while strengthening contractor competence assessment through SKTE and elevating worker consultation.

PROGRAM OVERVIEW

The program further prepares you to command **F10 notifications, HSE inspections and enforcement requirements** with complete confidence. You will **examine digital Health and Safety Files, technology-enabled compliance monitoring, and the critical relationship between CDM 2015, the Health and Safety at Work etc. Act 1974 and the Building Safety Act 2022**. By the end, you will be fully equipped to identify compliance gaps earlier, strengthen inspection readiness, and transform CDM obligations into practical controls that deliver safer, more resilient construction projects.

Upon successful completion, you will earn the **Certification in UK Construction Design and Management (CDM) Regulations and Compliance**, validating your expertise in CDM 2015, construction health and safety governance and regulatory risk management. This lifelong certification strengthens your professional credibility and equips you to identify compliance gaps earlier, sharpen inspection readiness and apply CDM requirements with authority across the entire construction project lifecycle.
